

HVLS 12

12' High Volume Low Speed Ceiling

Energy efficient. To our knowledge, no other HVLS fan moves as much air (certified) for so little power consumption (certified).

Low carbon footprint. No other large industrial ceiling fan has less aluminum.

Lighter weight. Our 6 blade units last longer, provide excellent air circulation and cost less to ship than other fans with more blades.

All HVLS Fans are CE Certified. UL listings are available as required.

General Information / Performance @ Max Speed / Typical Coverage

Diameter

Feet _____	12'
Meter _____	3.658

Number of Blades _____	6
---------------------------	---

HP _____	1
kw _____	0.75

Hanging Weight

w/Universal Mount

lbs _____	190lbs
Kg _____	86.2kg

Shipping Weight

w/All Fan Components
